Slim Technology

Now available, this new generation of LCD modules is rapidly becoming the industry standard for hand held and telecommunication devices. Features include:

- Ultra Compact
- Light Weight
- Higher Resolution
- Minimal Power Consumption
- Pixel gaps as low as 0.01mm
- Low Voltage Operation

We have combined our existing TAB technology with our SLIM technology to offer an extremely thin, light-weight and cost effective approach to solving critical applications where cost, size, and power consumption are paramount.

Applications

- Telecommunications:
Portable Phones / Pagers
- Instrumentation:
Temperature / Time / Voltage
- Portable Computers:
Palmtops / Organizers
- Informative Displays:
Dot matrix / Registers / Gas Pumps
- Medical Instrumentation:
Monitoring Equipment
- Consumer Electronics:
Games / Toys / Calculators
